**Brian Clarke**  
Head Strength and Conditioning/  
Speed Development Coordinator  
Noblesville High School

Coach Clarke is a member of the National Strength and Conditioning Association and is entering his 8th year as a head strength and conditioning coordinator. In his seven years as a Head Strength and Speed Coach his teams have won 10- State Championships.

Coach Clarke came to Noblesville in the summer of 2008 after highly successful stops at Warren Central (05-08), and Pike High School (02-05). At Warren Central Clarke's teams' won 9- State Championships in Football (05/06), Men's XC (05/06), Men's Track (05,06), Women's Track (06,07,08). At Pike High School the Men's Basketball team went undefeated in 2003. In July 2007 Sports Illustrated ranked Warren Central the #1 public high school in the USA for athletics. In addition, Coach Clarke was named a semi-finalist for the National High School Strength Coach of the Year in 2007 by, American Football Monthly.

Coach Clarke is a strength and conditioning specialist and personal trainer who is responsible for over 350 athletes daily. He has trained hundreds of collegiate athletes. Clarke teaches Noblesville's Athletic Weights class and is responsible for developing and implementing pre/post season strength and conditioning programs for all athletic teams.

Coach Clarke has an extensive background in developing athletes. Comprehensive Athletic/ Speed Development is the key to reaching individual potential. His training regime focuses on athletes becoming balanced, efficient movers with focuses on stability (strength) and mobility (flexibility).

The goals of the Noblesville Athletic/ Speed Development Program are to enhance athletic performance, increase speed, increase lateral speed, prepare athletes for competitions, prevent injury, improve confidence, and develop a championship mentality/attitude.

- You get 5 weeks of training
- Camp T-shirt
- Coach to student ratio of 1:5 or less.

**Noblesville Fundamental Strength Training Club**

This club teaches fundamental strength training methods, techniques, and practices for athletes in grades 6<sup>th</sup>-8<sup>th</sup>. All activities are age appropriate with appropriate volumes and loads. Athletes who want to be able to increase strength, lean body mass, jump higher, be more flexible, attain body awareness, balance, strength, speed, power, and sport performance in his/her particular sport should attend.

**Activities include:** Multi-joint weightlifting techniques (Olympic movements), free weight lifting techniques, squatting movements with one and both legs, bodyweight calisthenics, mobility, circuit training, hurdle joint mobility drills, low level plyometrics, etc... Our goal is to help each athlete maximize his or her athletic potential. Enrollment is limited.

**Safety and Concerns:** Parents first typical concern when they consider having their child strength train is safety. That is our first concern as well. We abide by the NSCA guidelines for youth strength training. Please view the listed guidelines that we incorporate into our camp.

**National Strength and Conditioning Association's Recommendations for Youth Strength training:**

- All athletes should be taught proper exercise and spotting technique. Exercises should initially be taught with no or minimal load to allow proper technique to be learned.
- All training sessions should be supervised by an experienced fitness professional. Each child should be physically and emotionally prepared to participate in a strength training program. Also consider the athlete's maturity level when introducing more advanced exercises.
- Children should have realistic expectations/goals.
- The exercise area should be safe and free from hazards.
- Every exercise session should be preceded by approximately five-10 minutes of a general warm-up, followed by several sport specific warm-up exercises performed at a light intensity.
- Equipment should be properly sized for a child.
- Begin lifting, preferably, with body weight exercises. Athletes can also engage in basic machine exercises if they use light loads that allow the athlete to complete 12-15 repetitions. The program should progress to ultimately encourage athletes to perform one-three sets of the exercises on two-three non-consecutive days.
- Each set should consist of six-15 repetitions.
- Never increase the load being lifted by more than five percent for upper body or 10 percent for lower body exercises.
- Competition between children should be discouraged since this may lead to athletes performing maximum lifts.
- Strength training should be stopped at any sign of injury and the child should be evaluated prior to re-entering the strength program.
- Never force a child to participate in a resistance-training program.
- Keep the program fun.
